Third DAO Consultation: Investment in BIM Finance

The voting period begins on Monday 19/06/2023 and ends on Sunday 25/06/2023.

Our third DAO consultation relates to the investment of €200,000 in the form of \$BIM digital tokens in the capital of our subsidiary, BIM Finance.

BIM Finance, a subsidiary of BIM Group, was created with the objective of developing our blockchain solutions for our ecosystem, obtaining the necessary approvals for our portfolio of digital assets and setting up a launch pad for cryptocurrencies, and other initiatives.

The BIM Group plans to invest €200,000 in \$BIM digital tokens at the crypto address MATIC:
[matic:0x80A30d81c92f77829B92F502Ce021d4666b782c5].

This investment will increase the share capital of BIM Finance, allowing us to finance the technological developments necessary to achieve our goals.

The BIM tokens invested in this transaction will not be sold on the market. Their main role will be to act as leverage for other future investments. By investing our BIM tokens in this way, we reinforce their usefulness and value potential, while ensuring their stability in the market.

By investing our BIM tokens in this way, we reinforce their usefulness and value potential, while ensuring their stability in the marketplace. Thus, BIM token holders can be assured that their investments are being used thoughtfully and strategically to maximise impact and profitability.

We invite you to participate in the vote and support this initiative that will help strengthen our blockchain ecosystem and create value for all BIM token holders.

By investing our BIM tokens in this way, we reinforce their usefulness and value potential, while ensuring their stability in the marketplace. In this way, BIM token holders can be assured that their investments are being used thoughtfully and strategically to maximise impact and profitability.
